Subject: RE: Agenda for tomorrow

Jim – the meeting topic for tomorrow is to discuss how the LWG developed PRGs in 2009 and determine if the same process is to be used to calculate final PRGs or if some new methodology is needed. Discussion will focus on the food web model (bioaccumulation model) and BSAFs, relationships between types of tissue (different species, fillet vs. whole body, etc.), spatial variation in sediment and tissue, etc. The main focus will be on the development of the HH PRGs.

Subject: Agenda for tomorrow

Chip and Kristine:

We are gearing up for tomorrow's meeting to discuss the COCs, PRGs and RGs. Does EPA have a specific agenda for tomorrow's meeting that you can share with us? For example, are there specific questions you want to put on the table for resolution that our team can start prepping for today?

Thanks,

Jim McKenna
